Coronavirus: Boris Johnson moved to intensive care as symptoms worsen

🕒 7 April 2020

Coronavirus pandemic

Prime Minister Boris Johnson has been moved to intensive care in hospital after his coronavirus symptoms "worsened", Downing Street has said.

April 7, 2020

Qanon perspectives:

Could Boris Johnson, a well known public figure, get Hydroxychloroquine treatment and demonstrate a recovery from Coronavirus for the whole world to see?

Do not listen to 45 when he suggests untested [#Hydroxychloroquine](#) to treat [#COVID19](#) - listen to Fauci. Don't listen to 45 when he says heat will kill the virus; or he won't wear a mask; or when he calls hospital workers thieves, or refuses natl lockdown! 45 just can't be trusted!

New: A huge battle erupted yesterday in the Situation Room between Dr. Fauci and Peter Navarro

The argument was over hydroxychloroquine and things went off the rails when Fauci said most of the evidence was anecdotal leading Navarro to lose his temper

Educating Liberals ★★ ★

@Education4Libs

I don't give a damn if Twitter bans me for spreading the life-saving truth about a CHEAP, SAFE, & EFFECTIVE drug called Hydroxychloroquine that could END a worldwide pandemic.

Big pharma knows they are about to lose TRILLIONS after the Deep State's attempt to vaccinate us fails.

Trump seeks Modi's help to release Hydroxychloroquine ordered by US to treat COVID-19 patients

India on April 4 banned the export of Hydroxychloroquine and its formulations with immediate effect.

PTI | Last Updated: Apr 05, 2020, 12:51 PM IST

Hydroxychloroquine, an old and inexpensive drug used to treat malaria, is suddenly in news everywhere.

WASHINGTON: President Donald Trump has sought help from Prime Minister Narendra Modi to allow the sale of Hydroxychloroquine tablets ordered by the US to treat the growing number of coronavirus patients in his country, hours after India banned the export of the anti-malarial drug.

Trump said he spoke to Prime Minister Modi on Saturday morning and made a request to release Hydroxychloroquine - an old and inexpensive drug used to treat malaria - for the US.

@mitchellvii

You think big pharma wants a cheap drug like [#Hydroxychloroquine](#) to cure COVID-19? There are \$ trillions at stake with synthetic cures.

And now you know why Fauci dismisses it.
